PRELIMINARY AMENDMENT

Prior to examination, please amend the application as follows:

IN THE CLAIMS:

Amend claims 16 to 27 as follows:

--16. (Amended) A method for receiving signals transmitted in subfrequency bands of a receive frequency band, the method comprising:

performing pre-filtering to obtain a first signal frequency band containing the signals by adding a carrier frequency to the receive frequency band and by filtering the receive frequency band;

generating a frequency baseband containing the signals by adding an intermediate frequency to the first signal frequency band and by demodulating the first signal frequency band; and

performing post-filtering to obtain a second signal frequency band containing the signals from the frequency baseband by matching one or more of the carrier frequency and the intermediate frequency to at least one filter parameter;

digitizing information in the second frequency band; and
